About Company

Integrated Circuit For Electronic Industry established as a limited liability company that specializes in Electromechanical and embedded systems production and has built customers' trust and successfully delivered variety of

IC Electronic Industry started in maintain and install power boards, control boards, filling machines, mixers and IOT system upgrade for machines to evolve and reach capability to start manufacturing and electromechanical systems through a highly skilled specialized team with rich experience in design and-manufacturing.

VISION

To become the leading company in the manufacture and maintenance of electrical panels, automation systems and electromechanical works in the region by providing distinguished and superior services and developing ourselves and team continuously to achieve customer satisfaction and meet their needs with the highest level of quality, credibility and perfection.

Team Leader Message

MISSION

Providing maintenance and manufacturing services for electrical panels, maintenance and development of automation systems and electromechanical works, focusing on providing excellent customer service, our commitment to quality, credibility and mastery, and gaining customer trust in everything we do.

VALUES

Quality: We always strive to achieve the highest quality in everything we do.

Security: We are keen to provide a safe and healthy work environment for all our employees and customers.

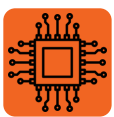

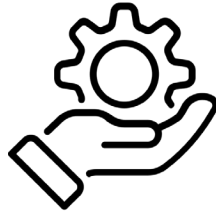

Respect: We respect all the people we deal with, regardless of age, gender, religion or cultural background.

Innovation: We are committed to innovation and continuous development and always strive to improve our products and services.

Transparency: We believe in transparency and integrity in all aspects of our business.

Sustainability: We are keen to apply sustainability practices and preserve the environment and the communities in which we operate.

Our Services

IC Electronic industry

specialized in the design and Electromechanical production systems.

power panel & control panel

In addition to the manufacturing, also work on maintaining and developing them to improve their efficiency.

production lines

We also have a team specialized in the maintenance and development of production lines and the maintenance and programming of control systems(PLC), in addition to

Electromechanical systems

One of the works we are distinguished by is the design, manufacture and installation of mixers. We also do all kinds of maintenance related to industrial machinery, as we have a team specialized in dealing with problems facing electromechanical systems, and also study these systems and work to develop them to improve their efficiency and productivity.

SOME OF THE COMPANY'S PROJECTS

01 High Concentration Acid Filling Machine

02 Putty Filling Machine

03 Putty Preparation System

We manufacture machines and production lines tailored to your needs, incorporating the latest technologies and specifications you require.

SOME OF THE COMPANY'S PROJECTS

01 Unsteady-State Heat Transfer Trainer

Is designed for the investigation of the temperature variation with time and heat flow within solid shapes that are subjected to sudden heating.

(IC-RW-HT102)

02 Photovoltaic Solar Energy Trainer

is a versatile training system used in the laboratories. With these system student can understand the various characteristics and applications of solar energy.

(IC-RW-PV110)

03 Data Logger

(IC-SEN-DL-103)

We manufacture educational devices for engineering colleges across various disciplines, tailored to the specifications required by universities, utilizing the latest technologies.

SOME OF THE COMPANY'S PROJECTS

04 Wind Energy Training Unit

It converts energy from the mechanical energy of moving air to electrical energy by means of a generator. The wind causes the shaft of the turbine to spin which in turn causes a generator to produce electricity.

(IC-RW-WEI09)

05 Solar Thermal Trainer

Is a small model of real time water heating system and can be used for the characterization and different heat transfer analysis.

(IC-RW-SLI04)

06 Power Electronics Trainer

Is a device designed for educational and training purposes in the field of power electronics.

(IC-EL-SG-106)

SOME OF THE COMPANY'S PROJECTS

07 Convection Heat Transfer Using Mini-Channels

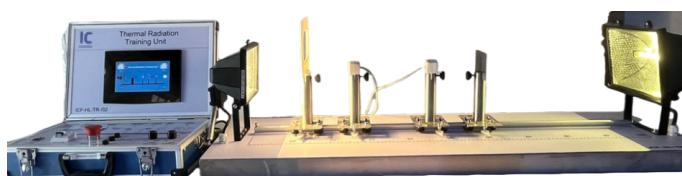

Convection Heat Transfer Using Mini-Channels has been designed by to study minichannels can be studied by determining the velocity distribution and the temperature field in the fluid region with the aid of the mass conservation principle (continuity equation), the fluid momentum balance equations and the energy balance equation.

(ICF-HL-HCMC-101)

08 Thermal Radiation Trainer

The thermal radiation trainer is a mountable benchtop educational unit which is designed to investigate heat transfer through radiation and the laws governing radiation heat transfer as well.

(ICF-HL-TR-102)

09 Heat Exchanger Trainer

The Heat exchanger Training System, has been designed by to study and compare different types of small-scale heat exchangers working with parallel or counterflow arrangements.

(ICF-HL-MHX-101)

Our CLIENTS

**MANASEER
GROUP**

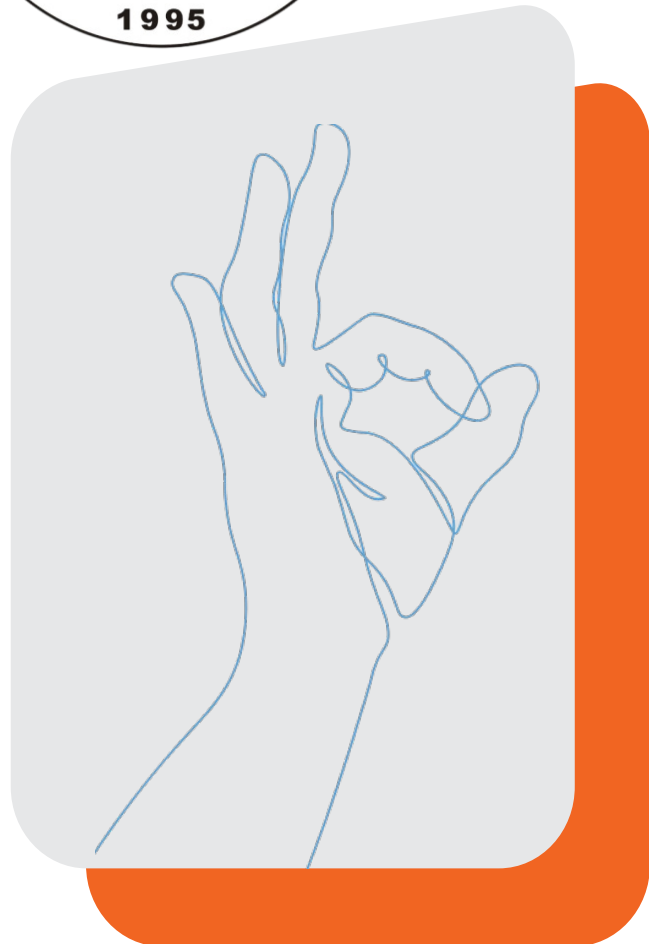

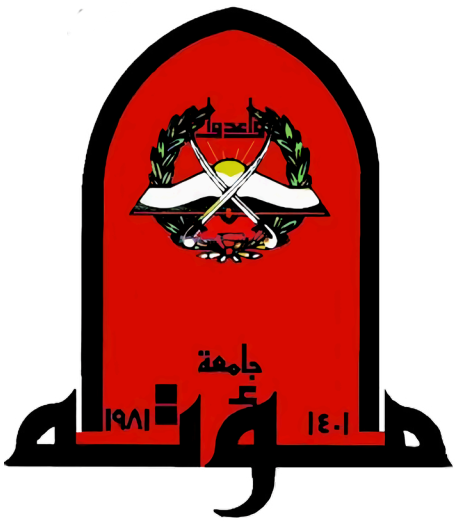

جامعة عمان العربية
AMMAN ARAB UNIVERSITY

We believe in building true partnerships founded on mutual trust, respect, and open communication. Our relationships are synergistic, goal-oriented, and enriched by long-term collaboration, which deepens our industry knowledge and strengthens connections. Our history of success and enduring client relationships speaks for itself.

Our CLIENTS

Why Choose Us?

Here are four reasons to rely on Integrated Circuit Company to help you manufacture educational devices and industrial machines:

- **Creative Solutions:** We empower you to make a difference by providing new insights and creative solutions that inspire innovation.
- **Happy Customers:** We go the extra mile to ensure our clients' satisfaction, consistently impressing them with our unwavering commitment.
- **Commitment to Quality:** Our dedication to quality is evident in our actions.
- **Sustainable Success:** We implement co-creation methodologies, fostering ownership that serves as a solid foundation for long-term success.
